

SAMPLE PDF / USA TO AUSTRALIA

# Bella's pet travel plan

A worked example of the format you receive. This three-page excerpt is not a complete checklist and must not be used as your travel plan.

|                       |                                                                                                               |
|-----------------------|---------------------------------------------------------------------------------------------------------------|
| Journey               | Mainland USA to Australia / dog / fictional example                                                           |
| Target departure      | May 1, 2027 - intended date, not a confirmed booking                                                          |
| Reported preparations | Microchip and current rabies vaccination reported. Records and identity verification still need confirmation. |
| Lab receipt supplied  | August 1, 2026 - illustrative laboratory-received date                                                        |

## Your next decision

**Confirm the existing records before committing to travel.**

Ask your approved vet to check that the microchip, vaccination record and RNATT report belong together. Keep unresolved items visible rather than assuming that a reported test means the pet is ready.

## One calculated milestone

|                  |                                                                                                                                      |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| January 28, 2027 | 180 days after the example laboratory receipt. This is a waiting-period milestone, not permission to export or a quarantine booking. |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------|

Your purchased PDF uses your own answers. Dates that cannot be established from your records are marked for confirmation, not invented.

SAMPLE PDF / ACTIONS AND RESPONSIBILITIES

# Know what to do next.

An excerpt from an ordered checklist. The complete plan adds the applicable route and pet-specific steps; this sample deliberately shows only part of the journey.

|                     |                                                                                                                                                                                                |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 / Confirm records | <p><b>You + approved vet</b></p> <p>Collect the microchip details, vaccination record and blood-test report.<br/>Ask the vet to resolve discrepancies before relying on the timeline.</p>      |
| 2 / Check timing    | <p><b>You + approved vet</b></p> <p>Use the laboratory-received date for the Australian 180-day milestone.<br/>Confirm report validity and uninterrupted vaccination separately.</p>           |
| 3 / Permit planning | <p><b>You + relevant authorities</b></p> <p>Check the required declaration and import-permit documents. Follow the granted permit conditions; do not treat this PDF as an import approval.</p> |

## Questions to take to your vet

What still needs checking in the records? Which appointments depend on the permit or itinerary? Which dates should I confirm before paying for flights?

## Keep these outstanding

Identity-verification evidence, final itinerary, permit conditions and quarantine availability are not established in this fictional example. They remain open items, not completed checks.

## Source for the example timing and import sequence

YOUR \$49 ORDER / PDF + EMAIL CLARIFICATION

# A plan you can use. A reply when you need clarity.

|                      |                                                                                                                                                   |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Personalized PDF     | Your preparation sequence, timing based on available records, documents, official links and questions to resolve. No app account or subscription. |
| Delivery             | Emailed within 24 hours of confirmed payment and receipt of all required details.                                                                 |
| 7 days of email help | Clarification about your plan for seven days after delivery. Replies within 24 hours.                                                             |
| One updated PDF      | Request one revision during the seven-day support period for corrected details or a changed date on the same route.                               |
| One payment          | \$49 USD. If your plan is not useful, request a refund within 48 hours of purchase.                                                               |

## What is not included

Veterinary or legal advice, document certification, guaranteed eligibility, flight bookings, permit applications or representation before authorities. Your vet and the relevant authorities must confirm final requirements.

## How email clarification works

Reply to your delivery email with a question about the plan, or contact [hello@pettravelchecklist.com](mailto:hello@pettravelchecklist.com). For the included revision, send the corrected details together in one request.
